

## Testimonial

Mar 13<sup>th</sup>, 2024

Surgiform is my favorite implant material to re-build facial contour including forehead and temple hollowing, infra- orbit/ mid-face and paranasal depression. I used 3D printing skull as guide to customize the required shape implant with Surgiform. And the product can be fixed without screw, instead, the material is fixed to fascia or fix to bone with suture through bone drilled holes. In comparison with silicone implants, Surgiform provides my plastic surgery a better choice related to safety, biocompatibility, and hand- made customized results .
